

Name: New York Hall of Science

Date Printed: 01/24/2020

Posted On: 10/31/2018

Industry: Other

Corporate address: New York, New York City (Queens),

Description

The New York Hall of Science (NYSCI) was founded at the 1964-65 World's Fair and has evolved into New York's center for interactive science, serving a half million students, teachers, and families each year.

NYSCI serves schools, families and underserved communities in the New York City area, offering informal, hands-on learning through various products and services that use the "design-make-play" method of bringing delight and play to educating science, technology, engineering and math (STEM).

NYSCI Explainer Daisy Tetecatl talks about being a woman in STEM and how having a STEM education helps achieve Sustainable Development Goal #5 (Gender Equity). She also discusses how women and girls with a STEM training can better support achievement of all other SDG goals.
