Industry: Manufacturing

Corporate address: California, Fremont,

---

## Description

### Overview

As a trusted, collaborative partner to the world's leading semiconductor companies, Lam Research is a fundamental enabler of the silicon roadmap. In fact, today, nearly every advanced chip is built with Lam technology.

### A History of Innovation

Since 1980, Lam Research has played a key role in contributing to the extraordinary pace of innovation in the semiconductor industry.

Our market-leading products and services enable our customers to build smaller, faster, more powerful, and more power-efficient electronic devices—the kind that are driving the proliferation of technology into our everyday lives

As a global supplier of innovative wafer fabrication equipment and services to the semiconductor industry, Lam is a fundamental enabler of the silicon roadmap. We design, manufacture, refurbish, and service semiconductor processing systems used by chipmakers to manufacture integrated circuits (ICs).

Lam Research is committed to delivering products that are safe and designed with environmental stewardship in mind. We work with our global customers to reduce our environmental footprint in terms of energy consumption and manufacturing waste streams. The quality standards that drive the development of our products are rigorous. In fact, Lam Research was one of the first companies in the semiconductor industry to be registered to the Quality Management System standard, ISO 9001. ## **Culture and Benefits**

## **COMMITTED TO INCLUSION, DIVERSITY AND YOU.**

We're better together. Every one of us has unique viewpoints and experiences, which are the key to unlocking new innovations. Diversity promotes creativity, mutual respect, growth—all of which are central to our Core Values. But diversity and inclusion must be continually fostered and nurtured. That's why we promote it in the STEM pipeline from elementary schools to universities and professional organizations. It's why we've established a former military hiring program to help hire and place veterans. And it's why we support university sponsorships and professional networking events for our employees.

To us, success means reflecting the communities where we work and the customers we serve. That's the kind of success we're constantly striving for.
